US Youth Soccer ODP Structure

USYS ODP ID Invitational

The National ODP cycle starts in July and there will be identification events held in each region. Due to the COVID 19 pandemic, the camp structure will not look like it has in previous years. We will be moving away from the dorm environment for players and staff. The parent/guardian will be responsible to get the players to the event, as well as to and from the fields. In cases where players are having to travel to the event, hotel accommodations have been secured for parent booking.

USYS ODP ID Invitational will invite 2004 – 2009 Boys and Girls to participate. Players that receive an invitation to participate at a Region ID Invitational will be selected through identification and scouting but mostly through input from the state technical leaders.

Identification & Scouting

The identification and scouting of players have been limited due to state and regional events being canceled. We will be relying on the state technical leaders to help with the process of making sure the correct players are being identified. There are still several state and regional ODP events scheduled to take place that will help players get exposure for the USYS ODP Invitational.

Registration

Each player will register through the Affinity platform (state associations will **not** be invoiced for any camp fees) and complete all required documentation. The event fee for 2021 is \$300 per player. If a state would like to subsidize any portion of the player's event fee, they may do so through the Affinity platform. (Please contact your National ODP Admin for details).

Benefits

At the conclusion of the ID Invitational, the region staff in conjunction with the technical leaders will select players in all age groups to form region pools. Region staff in conjunction with state technical leaders will then name the top 36 players in each age group that will be invited to attend the interregional events. The reason for selecting regional pools is to monitor the players during the cycle with the understanding that players progress at different stages.
